

Sravanthi N

+91 74833 79635 · shravanthinpk@gmail.com · [LinkedIn](#) · [GitHub](#) · Bangalore

Computer Science undergraduate (Expected 2027) with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks. Proficient in Java, Python, C, and MySQL, with hands-on experience building REST APIs with FastAPI and working with relational/NoSQL databases. Strong problem-solving skills with a focus on writing clean, maintainable code. Experienced in leveraging AI tools for rapid software prototyping and learning applied machine learning workflows.

EDUCATION

B.E. Computer Science — Nitte Meenakshi Institute of Technology, Bangalore 2023 – 2027

CGPA: 8.3/10

Relevant Coursework : Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, AI & Machine Learning

TECHNICAL SKILLS

Languages: Java, Python, C

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOPs), DBMS, Operating Systems, Computer Networks, Debugging

Backend & APIs: REST APIs, FastAPI

Databases: PostgreSQL, MySQL, MongoDB

ML / NLP: Scikit-learn, Hugging Face Transformers, DistilBERT, OpenCV

Tools: Git, GitHub, VS Code, AI Coding Assistants (Claude, ChatGPT, Perplexity)

PROJECTS

Real-Time Twitter Sentiment Analysis - NLP & ML Pipeline

Python · DistilBERT · XLM-RoBERTa · MLflow · FastAPI · AWS

Built and evaluated a sentiment analysis system using pre-trained DistilBERT and XLM-RoBERTa models via Hugging Face to classify **10,000+ labeled tweets**.

- Designed **RESTful APIs using FastAPI** and deployed the model on AWS for real-time sentiment predictions.

ML-Based Intrusion Detection System *Python · Scikit-learn · Streamlit*

- Developed an end-to-end network intrusion detection system using a **Random Forest model** trained on preprocessed NSL-KDD data.
- Integrated the model into a **Streamlit dashboard** for real-time anomaly detection and performance monitoring.

Automated Attendance (Face Recognition) *Python · OpenCV · face_recognition*

- Developed a face recognition system to detect, encode, and match faces from multi-person images, processing **30+ students per session**.
- Automated attendance reporting by converting image-based detection results into **structured CSV records**.
